

Franco Caraffo

Fullstack Developer · Mobile & Backend

Buenos Aires, AR · caraffo16@gmail.com · +54 9 2262 620271 · linkedin.com/in/franco-caraffo · github.com/Caraffo

SUMMARY

Systems Engineer (UNICEN) and fullstack developer focused on mobile apps and backends. I build products end to end with Flutter and Python, from architecture to store release and production support. Lead mobile developer at Gilson Housing Partners and founder of Viajapp, a ride-sharing app live on the App Store and Google Play.

EXPERIENCE

Gilson Housing Partners gilsonhousingpartners.com Aug 2025 – Present
Fullstack Developer

- Lead developer of **Resident Concierge** (formerly iResident), a Flutter app for residents of multiple US public Housing Authorities. Residents use it for work orders, inspections, recertifications, chat and community events.
- Built the recertification wizard (household, income, assets, expenses, document upload and legal signature). It generates each Housing Authority's official PDF packet.
- Built live inspector tracking with ETA using iOS Live Activities / Dynamic Island and Android live notifications. Also built the background geolocation layer of **INSPECT**, the inspectors' app.
- Built real-time chats on Firestore (support bot with human handoff, plus inspector, community and specialist chats) and push notification routing with FCM.
- Develop backend features in **GCCS**, the multi-tenant Django + PostgreSQL core: resident APIs, recertification packets, inspection rescheduling, SMS/push campaigns (Twilio, FCM) and KPI exports. Implemented hybrid auth with the Concierge FastAPI services (token exchange to JWT).

Stack: Flutter · Riverpod · GoRouter · Firebase · Sentry · Django · FastAPI · PostgreSQL · Docker

Viajapp viajapp.com.ar Aug 2024 – Present
Founder & Sole Developer

- Designed and built a ride-sharing and parcel delivery app for Argentina, live on the App Store and Google Play.
- Flutter app for iOS and Android and a layered FastAPI backend (endpoint / service / repository) on PostgreSQL with Alembic migrations.
- Mercado Pago payments with webhooks and refunds, and identity verification (email, phone, Nosis and ID photo) required to book or publish.
- In-app chat, FCM push notifications, a route network of enabled hubs and regional zones, and demand alerts that notify drivers about trips people are looking for.

Stack: Flutter · FastAPI · PostgreSQL · Mercado Pago · FCM · Google Maps · JWT

PROJECTS

BookIt (2026 · co-founder) — Marketplace for booking local services (barbers, tattoo studios, beauty salons) with appointments, walk-in queues and a map of nearby shops. Flutter · Supabase · PostGIS

Claudio (2026 · personal) — AI personal assistant with tools for finances, notes and activity, voice input and receipt reading. Flutter · Node.js/TypeScript · WebSocket · Claude API

Easy Breathing (2026 · client) — Internal CRM for an HVAC company: jobs, technicians, expenses and P&L reports. React · TypeScript · Firebase

EDUCATION

Universidad Nacional del Centro de la Provincia de Buenos Aires (UNICEN) Tandil, Argentina
Systems Engineering Mar 2020 – Aug 2025
University Programming Analyst Mar 2020 – Dec 2024

SKILLS

Mobile	Flutter, Dart, Riverpod, GoRouter, Google Maps, Live Activities, FCM
Backend	Python, FastAPI, Django, SQLAlchemy, Node.js, TypeScript, REST, WebSockets
Data & Cloud	PostgreSQL, MySQL, MongoDB, Firebase, Supabase, Docker, Sentry, Git
Also	React, JavaScript, Java, C++, Agile (Scrum, SAFe)
Languages	Spanish (native), English (advanced, C1)
